

Introducing a new dimension

in beautiful eyes....

The Facts

- Professional Semi permanent extensions
- Lasts up to 2 months
- Natural to the touch
- Not heavy, completely weightless
- Thickens natural lashes
- Lengthens natural lashes
- Thicker at the base, with tapered tip
- Pain free application
- Looks 100% natural
- Available in different Lengths
- Available in different thicknesses
- Does not damage natural lash
- No mascara, tint or perm necessary
- Can be painlessly removed by technician

Before

After

Nouveau Lash Extensions

- Nouveau Lashes are for professional application only - the entire procedure is very comfortable and relaxing.
- Nouveau Lashes are light, extremely comfortable on the eyes and will not prematurely cause natural lashes to fall off, as can be the case with traditional false eyelashes.
- Nouveau Lashes normally last for approximately two months, depending on the life-cycle of your natural lashes. Made to be identical to natural lashes, the lash base is flat and the lash tip is fine and polished, just like real lashes.
- It takes approximately 90 minutes to two hours to apply a full set of lashes. *Retouching is recommended every two to three weeks to help maintain the fullness of the lashes.*
- Nouveau Lashes naturally darken your lashes, so mascara is not necessary. If desired, water-based mascara can be applied on the tip of the lashes for further enhancement. Or have your lash technician tint your lashes a day before your treatment for even darker results.

Aftercare

To ensure your Nouveau Lashes are long lasting and stay beautiful proper care and maintenance are required.

- For the first two hours after Nouveau Lashes treatment do not allow water to contact the lashes.
- For two days after Nouveau Lashes treatment do not steam your face, use a steam bath, swim or wash your face with hot water.
- Do not use waterproof mascara or mascara remover on Nouveau Lashes as makeup remover will affect the bond of Nouveau Lashes. Only use water based mascara on Nouveau Lashes tip.
- Do not perm Nouveau Lashes.
- Do not use a lash curler, as it will break both the Nouveau Lashes and natural lashes.
- Do not rub eyes or lashes when washing your face, always pat lashes dry after cleansing.
- An occasional short visit to the sauna is fine. However going on a daily basis may cause earlier maintenance as the lashes could prematurely fall off or tilt in a different direction from your natural lash.
